## Tesmec Evolution Onwards

### Tesmec Unique Stringing Digital Eco-system

- A complete after-sales **experience**
- A digital suite enchanted with **bidirectionality**
- + Includes a **remote monitoring** application
- + includes a **reporting system**
- + Ongoing with future developments

**Report Easy is the feature that allows you to receive automated reports regularly, optimized for any device.**

- + **Weekly Performance Reports:** Detailed insights into machine performance, including pull/tension, speed, meters, operating hours, and productivity.
- + **Monthly Fleet Reports:** Health status of your machines, such as consumption, upcoming maintenance, and working hours.
- + **Tailored reports on demand:** Choose the content and frequency of your reports, adding your company logo for a professional touch. Manage users and recipients, with future plans for customization tailored to each client.

### Access the Tesmec portal easily and quickly

With **CTRL App**, discover a completely revamped interface designed to be more intuitive, faster, and user-friendly. You can manage all CTRL Room functionalities effectively and efficiently. Available for download on all major stores and accessible from desktop as well.

#### New Features with CTRL App

- + **Alarm Generation:** Receive automatic notifications when personalized thresholds are reached.
- + **Custom Links:** Insert useful links within the mobile application to easily access key resources.
- + **Report:** Consult all generated reports to keep your fleet under control at all times.

Simplify your experience with Tesmec and stay connected to the latest innovations!

## Teo CTRL Room

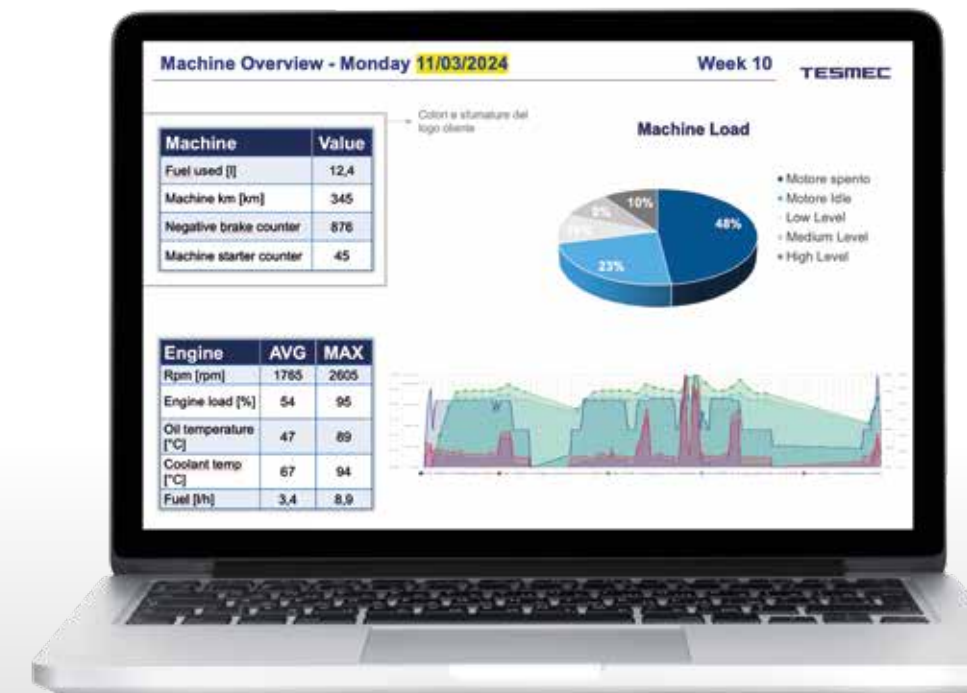

### Real-Time Monitoring Service
